

ADIL ZAIDI

1135 E Apache Blvd, Tempe, AZ 85281 | (480) 679-3589 | arzaidi@asu.edu

EDUCATION

Arizona State University - Ira A. Fulton Schools of Engineering, Tempe, AZ

Aug 2022 – May 2027

Bachelor of Science in Electrical Engineering

- Relevant Coursework: Circuit Analysis I & II, Hardware Design Language, Semiconductor Device Fundamentals, Power Systems, Quantum Mechanics, Embedded Systems, Microcontrollers, Power Electronics
- Dean's List - Fall 2022

TECHNICAL SKILLS

Programming & Embedded: C/C++, Arduino, Python (basic scripting), embedded systems, microcontrollers, sensor integration, motor control

Digital Design - Learning: Verilog, FPGA development, Quartus Prime, Questa/ModelSim

Circuit & Simulation: LTspice, MATLAB, DC/AC circuit analysis, transient analysis, frequency response, op-amp circuits, RC filters, power electronics

Lab & Hardware: Oscilloscope, digital multimeter, function generator, breadboarding, soldering, motor drivers, basic circuit troubleshooting

Design: AutoCAD

ENGINEERING PROJECTS & SELECTED LABS

Arduino-Based Gesture-Controlled Portable Workstation

Arduino | C/C++ | DC Motors | Motor Drivers | Embedded Control

- Designed and built an embedded electromechanical workstation using an Arduino, DC motors, motor-driver circuitry, and a wheeled chassis.
- Developed embedded control logic for directional movement and speed control in response to user input.
- Integrated mechanical, electrical, and firmware subsystems and tested the system for stable motion and responsive operation.

Analog Circuit Simulation & Characterization

LTspice | OP07/UA741 | Oscilloscope | Function Generator | DMM

- Simulated RC low-pass and high-pass filters and compared theoretical and simulated gain, phase shift, and -3 dB cutoff frequency.
- Analyzed inverting and non-inverting op-amp circuits using transient and AC sweep analysis to determine closed-loop gain, bandwidth, and unity-gain frequency.
- Applied bench measurement techniques using oscilloscopes, digital multimeters, function generators, breadboards, and DC power supplies.

Digital Logic & FPGA Labs (In Progress)

Verilog | FPGA | Quartus Prime | Questa/ModelSim

- Currently developing and simulating Verilog modules while learning digital logic and HDL design workflows.
- Learning FPGA implementation and waveform-based verification using Quartus Prime and Questa/ModelSim.

PROFESSIONAL EXPERIENCE

Retail Sales Representative - T-Mobile (Wireless Vision), Tempe, AZ

May 2025 - Dec 2025

- Diagnosed customer device and carrier issues and explained technical solutions in clear, customer-friendly terms.
- Exceeded sales goals by 150% while consistently ranking among the top 10% of sales representatives in the district.
- Managed point-of-sale transactions accurately and collaborated with team members to maintain efficient store operations.

Retail Associate - JCPenney, Tempe, AZ

Dec 2023 - May 2024

- Supported customers with product questions and store navigation while maintaining a high-quality service experience.
- Promoted store credit-card enrollment and contributed to team sales goals through consistent customer engagement.
